A PRODUCTIVE, STRESS-FREE EXPERIENCE THROUGHOUT THE WORKDAY

Unified Communications has been around for more than 25 years, but you'd never know it based on the user experience. As you go about your day, it can feel like a series of puzzles you have to solve to get the technology in different meeting spaces to work. Precious time is wasted. Meetings run late and often bump up against the next scheduled meeting. Frustration builds up. Productivity goes down.

By providing a simple, consistent user experience in all the places you work, Crestron Flex solutions clear the way to a productive, stress-free day.

8:00 AM The day begins

In your office, Crestron Flex P100 voice devices provide you with your day's calendar and connect you with coworkers and customers alike.

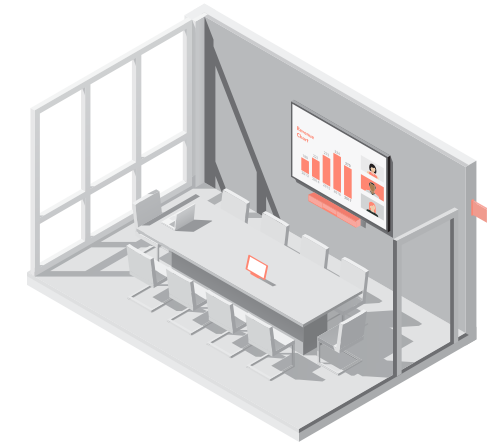

9:15 AM Emergency meeting

Your colleagues need to review a spreadsheet before the team meeting. No problem. Crestron scheduling touch screens connect to your calendaring system. It indicates a nearby huddle room is available. You book it on the spot.

10:00 AM Team meeting

Your colleague quickly pairs her Bluetooth® device to the Crestron Flex M100 tabletop conferencing system and you all discuss in real-time.

12:00 PM Global meeting

As you head to your next meeting, the illuminated Crestron room availability hallway signs help you easily locate the room. As you enter, your team's name is on the display and the same interface greets you on a 10" touch screen.

The Crestron Flex B100 smart soundbar provides crystal clear voice pickup around the room. One touch and everyone is connected to the room, along with the UK leadership team. On-time. Efficient.

3:30 PM Training session

Joining the session is simple. The Crestron Flex C100 Integration Kit provides an intuitive interface, even in the most complicated spaces, giving meeting facilitators the confidence they need to have a great session.

SIMPLE. SECURE. SCALABLE. CONSISTENT.

Crestron's open Unified Communications & Collaboration Solutions natively support the most popular third-party UC applications including Microsoft Teams™, Skype® for Business, and Zoom™. Built on the Crestron XiO Cloud™ IoT-based platform, you can deploy, manage, monitor, and evolve up to thousands of Crestron devices from a single dashboard.

Crestron UC and collaboration solutions come in several forms, but all bring a consistent user experience, regardless of the type of space in which they're deployed. That means more uptime and less strain on your support resources. Crestron also uniquely provides capabilities beyond the typical UC solutions, including digital signage, wireless presentation tools, advanced space analytics, networked audio and video distribution, and room scheduling integration.

Microsoft Teams

Microsoft Teams software is the hub for teamwork in Office 365® software. It integrates all the people, content, and tools work teams need to be more engaged and effective. Whether your organization is using an on-premises implementation of Microsoft Teams, running a hybrid deployment of Skype for Business and Microsoft Teams, or fully committed to IC and Microsoft Teams within Office 365, Crestron's open solutions are ready to support you.

 ONE-TOUCH JOIN

Skype for Business

The Skype for Business unified communications platform enables messaging, conferencing, online meetings, and collaboration as part of Office 365. With Crestron you can natively run Skype for Business in meeting rooms of every shape and size: conference spaces, boardrooms, multipurpose spaces, and auditoriums.

 ONE-TOUCH JOIN

zoom

Crestron UC and collaboration devices run Zoom Rooms natively to provide a complete, integrated solution. You get best-in-class AV presentation, room scheduling, video conferencing, chat, webinars and room control capabilities in your boardroom, conference, huddle, and training rooms, as well as executive offices and classrooms.

 ONE-TOUCH JOIN

OPEN UC

From the cubicle to the boardroom, Crestron offers the most complete line of open UC solutions. Only Crestron de-couples your organization's applications from your hardware, so you can switch them instantly. No penalty of expensive hardware changes or additional charges. With Crestron you always have the freedom to run the applications that best support your business needs, today and tomorrow.

CRESTRON FLEX P100 SERIES

The Crestron Flex P100 is an advanced voice-over-IP desk phone that integrates seamlessly with your existing infrastructure. It takes a new approach to the notoriously complex and disjointed world of telephony, taking advantage of the Crestron platform to bring Skype for Business and Microsoft Teams functionality to every individual workspace. The comprehensive physical keypad is complemented by a high-resolution 7" color touch screen display to deliver an intuitive and consistent user experience, all in a sleek package that complements any office décor. Zero-touch provisioning and centralized management via the Crestron XiO Cloud platform delivers tremendous time and cost savings.

KEY FEATURES

- Natively runs Microsoft Teams and Skype for Business with one-touch to join functionality
- Connects to network with latest security standards
- Exceptional HD sound quality for crystal-clear speech
- Full-featured keypad and high-resolution 7" color touch screen
- Place or receive calls using handset or speaker
- Zero-touch provisioning and centralized management from Crestron XiO Cloud

OPTIONAL USB AND BLUETOOTH COMPATIBILITY (CRESTRON FLEX P110)

70% of workplace collaboration happens at the desk.

WIRELESS PRESENTATION

Content sharing enhances communication, collaboration, and creativity, helping your organization be more efficient and productive. Crestron AirMedia 2.0 wireless presentation technology makes it easy. Meeting participants can sit or stand anywhere in a room or space and securely connect their laptops and smart devices to the display, regardless of OS. AirMedia 2.0 is built into the Crestron Flex M100 and is also available in standalone devices that enable you to transform lobbies, lounges, and other open spaces into productive meeting spaces. Beyond presentation capabilities, all AirMedia 2.0 devices support Appspace® software for digital signage needs, and connect to popular calendaring systems to show space availability.

ROOM SCHEDULING

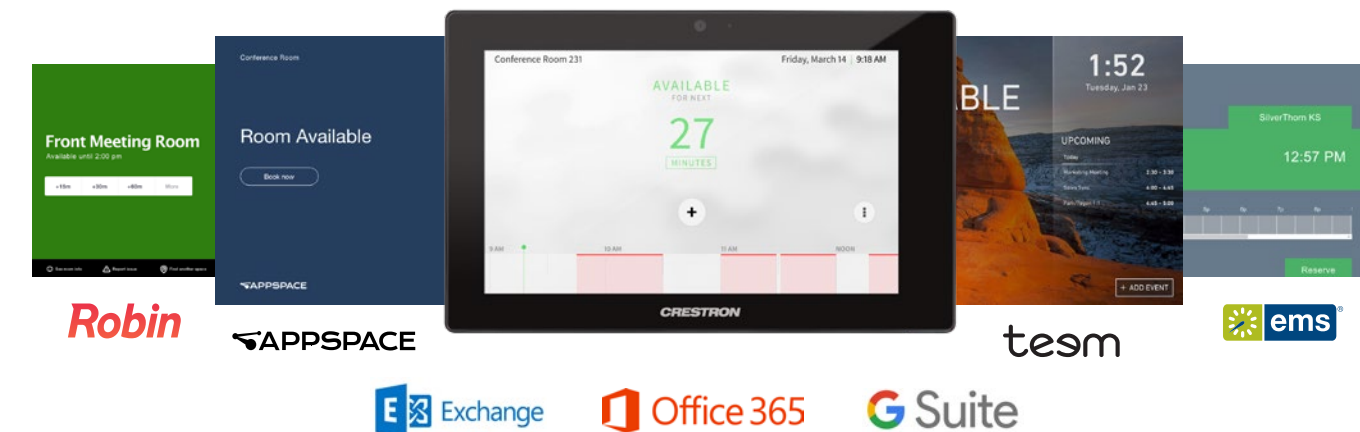

The modern workplace is fast-paced, flexible, and dispersed. You need a scheduling platform that not only keeps up with you, but makes everyone more efficient, connected, and collaborative across all spaces while meeting your booking requirements.

Crestron makes it simple and convenient to locate and book available meeting spaces from wherever you are; on your mobile, outside the room, or inside the room. The system directly connects to Microsoft Exchange, Office 365, and G Suite™ software, so people can book rooms on the spot. And the system is intelligent enough to return rooms to inventory when employees no-show, thereby optimizing usage. When spaces aren't in use, you can even repurpose the displays for digital signage via Appspace.

SCHEDULING WHERE YOU NEED IT

Crestron XiO CLOUD™

IOT-BASED PLATFORM

Winner of the 2018 Microsoft Global Partner of the Year Award for IoT, Crestron XiO Cloud is a revolutionary IoT-based service that enables you to securely deploy, proactively manage, monitor, and evolve workplace technology anywhere in the world through a standard web browser, and reduce associated complexities.

Hosted on the Microsoft Azure® IoT platform, and natively built into Crestron products, Crestron XiO Cloud delivers up to 90% reductions in installation time and dramatic improvements in device uptime. Most routine maintenance tasks, such as logo updates, can be performed from anywhere, automatically. Data gathered by Crestron XiO Cloud enables you to match new technology investments to actual usage and optimize your budgets.
